## Common Questions

### What is your ordering process like?

This is the fun part! Since we build each teardrop trailer to order, we work with you to design the best build to match your needs. The first step is choosing the options you'd like and submitting an inquiry on the ORDER NOW page. No commitment required, just a way for us to know what's important to you when we get in touch. Next we would dial in all options to your needs, then we would take a deposit and get your new trailer into the build queue.

### How long is the trailer build time?

Production for the Whisper is usually at one (1) a month build pace. Our lead time for trailers is normally one month. For a more detailed estimate please contact us.

### What kind of deposit is necessary to secure my spot in the build queue?

We take a 25% deposit for your trailer to enter the build queue, another 25% just before your build starts, and the remaining 50% will be due on delivery.

### Do you guarantee delivery date upon deposit?

We do our best to adhere to the timeframe quoted at deposit, but due to the complex nature of our builds and dependency on multiple other vendors to hit their deadlines, slight delays are possible. What we can promise is that we will communicate with you throughout the entire process.

### Are Second Wind teardrop trailers 4-season compatible?

Yes! We fully insulate all of our teardrop trailers not only to keep you warm in the winter, but also to help keep you cool in the summer heat.

### Will I be able to tow the Whisper with my vehicle?

Our Whisper has a dry-weight of 1300 lbs. Check with your vehicle's manufacturer to determine its tow rating.

### What kind of frame is the Trailer built on?

Each teardrop trailer frame is constructed with heavy-duty 2x2 welded steel and is issued a VIN and Manufacturers Certificate of Origin. This should be given to your home state's DMV for title issuing and registration.

### What sort of power options are there?

Each teardrop trailer comes standard with a 12V system that will run your lights, USB chargers, fan, and water pump (if you've selected this add-on). Each Trailer comes with deep-cycle RV batteries and can have solar power added to the package for off-the-grid charging options. In addition, we can also add 110V (house) power with inverters of varying amp ratings based on your needs.

### Do trailers come with a manufacturer's warranty?

We offer a 12-month warranty on all of our trailers to cover craftsmanship and defects. We're happy to discuss details of this in more detail one-on-one.
